

This form is to be completed by EECS graduate students upon submission of a doctoral thesis to the department.
Please attach a CV or resume...thank you.

STUDENT NAME:

CITIZENSHIP (circle) ☐ United States ☐ OTHER:

AREA (circle): ☐ EE ☐ or ☐ CS

DATE of THESIS SUBMISSION:

THESIS SUPERVISOR(S):

DATE of MIT DEGREE LIST:

Please notify us of your immediate future plans, by responding to the questions below:

1. Please check the type of job you are taking within the following broad categories:

Academic/faculty position
 Academic/researcher
 Academic/postdoc
 Industry
 Government
 Medical

Financial
 Management Consulting
 Self-Employed
 Other
 Un-Employed

- 2.

If you can let us know specifically where you are going, that would be most helpful:

Institution:

Title:

Location of Employment:

3. Check the area within EECS that best describes your area of employment:

Communications
 Systems, Decision and Control
 Signal Processing
 Bioelectrical/Medical Engineering
 Circuit Design
 Devices and Materials
 Electromagnetics and Energy
 Artificial Intelligence/Robotics

Hardware/ Architecture
 Numerical Analysis/Scientific
 Programming Language/Compilers
 OS/Networks
 Software Engineering
 Theory/ Algorithms
 Graphics/Human Interface
 Database/Information Systems
 Other:

THANK YOU, and ALL GOOD WISHES!

Jason Gross

RESEARCH INTERESTS

Programming Languages, Formal Verification, Performance of Automation in Interactive Proof Assistants, Homotopy Type Theory, Category Theory, Program Synthesis, Cryptography

KEY CONTRIBUTIONS

Fiat Cryptography

- Collaboratively working on one of the world's first algorithm-level-optimizing compilers
- Collaboratively implemented proven-correct cryptographic code now used by Google Chrome, and in the majority of secure connects from web browsers

Interactive Proof Assistants

- Researching performance issues that impact scalability of automated verification
- Reporting the plurality of bugs in the proof assistant Coq

EDUCATION

Massachusetts Institute of Technology

2013–2021

PhD in Computer Science

Cambridge, MA

Advisor: Adam Chlipala

Thesis: Performance Engineering of Proof-Based Software Systems at Scale

SM Thesis: An Extensible Framework for Synthesizing Efficient, Verified Parsers

Massachusetts Institute of Technology

2009–2013

BS in Mathematics and Physics

Cambridge, MA

GPA: 4.6/5

INTERNSHIPS

Machine Intelligence Research Institute

June 2019–August 2019

Type Theory Intern

Berkeley, CA

- Worked on formalizing type theories and on proving things within proof assistants

Google

June 2018–August 2018

Software Engineering Intern

Cambridge, MA

- Worked with BoringSSL on integration of proven-correct low-level ECC primitives into Chrome

Google

June 2016–September 2016

Software Engineering Intern

Mountain View, CA

- Formalized low-level ECC primitives with proofs of correctness

Microsoft Research

June 2014–August 2014

Intern

Cambridge, United Kingdom

- Created a language for specifying input/output behavior of x86 assembly programs with Andrew Kennedy and Nick Benton; Verified the I/O behavior of a number of simple programs
- Improved automation of the x86proved library

MIT CSAIL

April 2012–June 2014

Researcher

Cambridge, MA

- Entered a significant amount of category theory into the automated proof assistant Coq (<https://github.com/HoTT/HoTT/tree/master/theories/Categories>)
- Made progress towards an interface for databases and database migration on top of category theory in Coq with David Spivak and Adam Chlipala

MIT CSAIL

November 2009–September 2011

Researcher

Cambridge, MA

- Designed from scratch a data collection webpage, collected data for, and helped with research of Brenden Lake, Ruslan Salakhutdinov, and Josh Tenenbaum, on categorical and transfer learning.

Commack High School

Fall 2006–Summer 2009

Independent Researcher

Commack, NY

- Independently researched circuits over sets of natural numbers for three years.
- Won fourth place award in mathematics in ISEF (Intel International Science and Engineering Fair) in 2009, third place award in ISEF 2008.

COMPUTER SKILLS

- Proficient skills – Coq, Mathematica, git, Python, JavaScript, BASIC
- Working knowledge – C, C++, Agda, OCaml, Haskell, Scheme, HTML, CSS, Perl, Java
- Basic knowledge – Matlab, Idris, Ruby, Ur/Web, x86 Assembly

TEACHING

- Instructor at Monsoon Math: Classes on category theory, linear logic, and Löb's theorem
- TA for 6.172 (Performance Engineering): Led recitations, analyzed and explained assembly output of `gcc -O3` to teach vectorization
- TA for 8.012 (Physics I) and 8.022 (Physics II) in Experimental Study Group
- Volunteer for MIT ESP: Classes on \LaTeX , philosophy, linear algebra, and quantum mechanics

EXTRACURRICULAR ACTIVITIES

- Co-maintainer of the homotopy type theory Coq repository (HoTT/HoTT on GitHub)
- MIRI Decision Theory Workshop Attendee: Formalized various versions of Löb's theorem in Agda and Coq
- Committer to the SIPB BarnOwl project (<https://barnowl.mit.edu>)
- SIPB (Student Information and Processing Board) Member
- Canada/USA Mathcamp (Summers 2006–2009)
